

Subtrahera från 11, 12 och 13

► Stryk entalen du tar bort. Subtrahera.

$$11 - 4 = \underline{7}$$

$$11 - 6 = \underline{5}$$

$$11 - 3 = \underline{8}$$

$$12 - 6 = \underline{6}$$

$$12 - 8 = \underline{4}$$

$$12 - 5 = \underline{7}$$

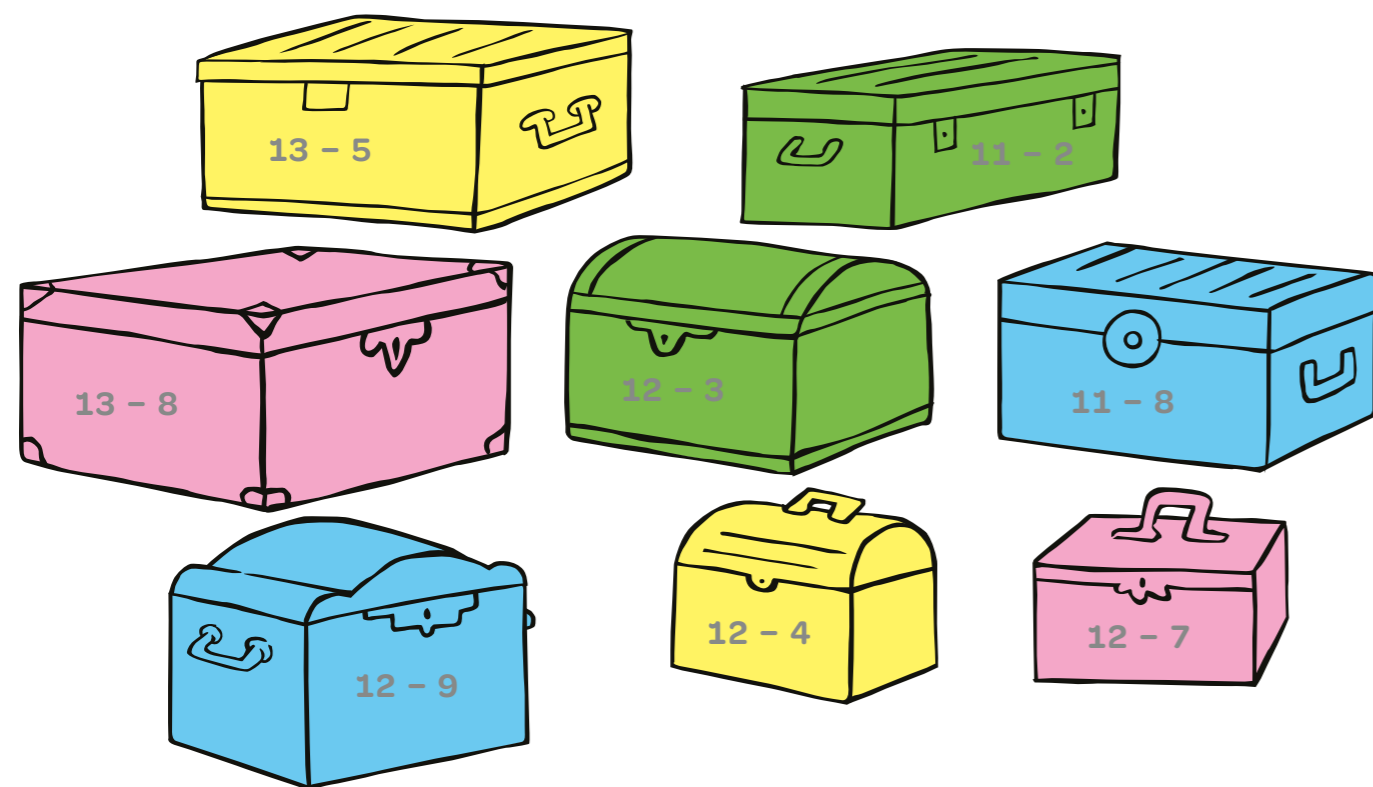

$$13 - 4 = \underline{9}$$

$$13 - 7 = \underline{6}$$

► Måla lådor med samma differens i samma färg.

Subtrahera från 14, 15, 16, 17 och 18

► Välj en subtraktion från repstegen. Skriv under rätt differens.

differensen 7

$$\begin{array}{r} 16 - 9 \\ 15 - 8 \\ 14 - 7 \end{array}$$

differensen 8

$$\begin{array}{r} 14 - 6 \\ 16 - 8 \\ 15 - 7 \\ 17 - 9 \end{array}$$

differensen 9

$$\begin{array}{r} 15 - 6 \\ 17 - 8 \\ 16 - 7 \\ 18 - 9 \end{array}$$

► $14 - \underline{5} = 9$
 $16 - \underline{8} = 8$
 $14 - \underline{9} = 5$
 $15 - \underline{6} = 9$

$15 - \underline{9} = 6$
 $14 - \underline{8} = 6$
 $17 - \underline{8} = 9$
 $14 - \underline{7} = 7$

$14 - \underline{6} = 8$
 $18 - \underline{9} = 9$
 $15 - \underline{7} = 8$
 $16 - \underline{9} = 7$

Subtraktionskort med tiotalsövergång

Klipp ut korten. Skriv differensen på baksidan. Träna flera gånger.

$11 - 2$	$11 - 3$	$11 - 4$	$11 - 5$
$11 - 6$	$11 - 7$	$11 - 8$	$11 - 9$
$12 - 3$	$12 - 4$	$12 - 5$	$12 - 6$

$12 - \underline{3} = 9$

Omkrets

▶ Hur lång är omkretsen?

 $\underline{14}$ cm $\underline{18}$ cm $\underline{10}$ cm $\underline{8}$ cm

▶ Mät sidorna med linjal. Räkna ut omkretsen.

Omkrets: $\underline{3} + \underline{3} + \underline{6} + \underline{3} = \underline{15}$ cm

Omkrets: $\underline{12} + \underline{4} + \underline{10} = \underline{26}$ cm

Omkrets: $\underline{4} + \underline{1} + \underline{4} + \underline{2} + \underline{8} + \underline{1} = \underline{20}$ cm
